Career Objective

Motivated and curious BSc IT graduate with a strong interest in web development and application development. Seeking an entry-level opportunity to apply Java, Python, React, SQL, HTML and CSS skills, learn from real-world projects, and contribute to building reliable, user-friendly digital solutions.

Education

BSc IT, Dnyansadhana College	2026
University of Mumbai CGPA: 8.60	Thane
Higher Secondary, Thirani College	2023
	Thane
Secondary Education, Little Flower High School	2021
	Thane (W)

Technical Skills

Languages C, C++, Java, Python	Database MySQL
Web HTML, CSS, JavaScript	Concepts OOP, JDBC, Advanced Java

Projects

Smart Traffic System

Designed an intelligent traffic-management concept to monitor and optimize vehicle flow using sensors and data analytics. Proposed dynamic traffic-signal adjustment based on road conditions to reduce congestion and intersection waiting time. Focused on improving road safety and enabling smoother, more efficient urban transportation.

AI Resume Analyzer, *Python, Flask, Gemini AI, HTML, CSS, JavaScript*

Developed an AI-powered web application that evaluates resumes against specific job roles. Implemented ATS-style scoring, technical-skill extraction, missing-keyword identification, and personalized improvement recommendations. Built a responsive interface for resume upload and analysis, and deployed the application on Render.

JavaQuest – Gamified Learning Platform, *Java, Web Development, AI*

- Developed a Duolingo-inspired platform for learning Java and other programming technologies through interactive lessons and quizzes.
- Designed structured learning paths to make programming education engaging and beginner-friendly.
- Deployed a user-friendly web application with an interactive learning experience.

Soft Skills

• Problem Solving	• Teamwork
• Decision Making	• Communication

Languages

• English	• French	• Hindi	• Marathi
